

Homework 3

jQuery

1) Remove list elements

Use the example code from the slides in Lesson 3 (Todo-list) and extend it with the feature to remove specific elements from the list. There are multiple ways how to implement this feature. Choose one.

2) Change order of list elements

Use the example code from the slides in Lesson 3 (Todo-list) and extend it with the feature to change the order of the list elements. Again, there are multiple ways how to implement this feature. Choose one. You may also use additional libraries.

3) Remove item from input field

To design the Todo-list more user-friendly, remove the item from the input field after it got added it to the list.

4) Show/hide the list

Implement buttons to quickly hide or show the whole Todo-list.

5) Animations

Implement different animations and effects of your choice.
